## Symbols of the Spiritual Teaching

by 'Billy' Eduard Albert Meier

 <https://shop.figu.org/b%C3%BCcher/symbole-der-geisteslehre>

**Billy:**

*By the way, are you interested in the symbols of the spiritual teachings?*

**Ptaah:**

*6. Of course.*

*7. We also have a considerable archive in this regard.*

**Billy:**

*Aha, then I could have saved myself the 30 hour effort.*

**Ptaah:**

*8. What do you mean?*

**Billy:**

*Well, I retrieved about 100 spirit teaching symbols from the memory banks, which I painstakingly recorded, after which Bernadette worked them out, which means at least half by tonight.*

**Ptaah:**

*9. Then you both have done a great job.*

*10. But you were right to retrieve the symbols from the memory banks.*

**Billy:**

*I think so, too, then no one can say the roast is being served to me on a plate.*

**Ptaah:**

*11. That was the meaning of my words.*

**Billy:**

*Good.*

... But would it be possible that you might bring me some music notes, a book or something else, maybe a picture?

Semjase

117. For you to look at and feel, yes, but I should not hand it over to let it go into your possession or to hand it around.

'Billy' Eduard Albert Meier

Why not then?

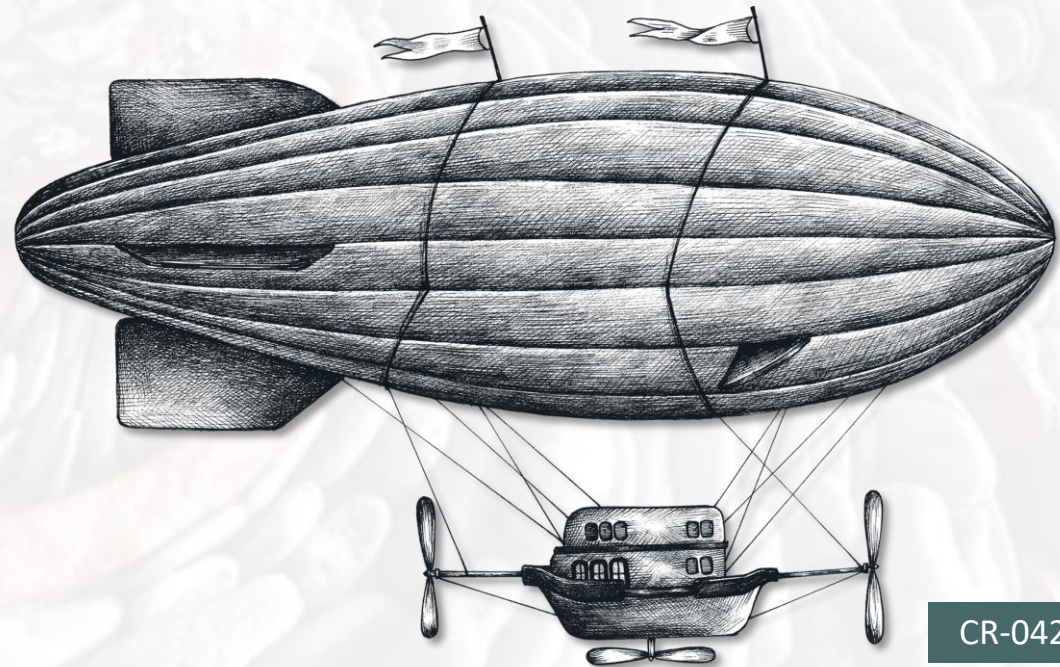

Semjase

118. These are the safety regulations that we must comply with in every form.

119. I shouldn't bring any things to Earth if they don't remain in my own possession.

120. The only exceptions are crystals and minerals, which are meant to help you.

Where do you get the money from when you walk around our Earth shielded from vibrations and buy something somewhere?

Semjase

122. For these purposes we look on Earth for precious metals and gemstones with our search devices, which we mine in very small quantities with our devices and sell to buyers, who compensate us with earthly money as an exchange value, which we then exchange into the required currencies as required.

Geld

Geld ist ein Stoff, der dauernd in Bewegung ist und der oft wie ein goldener Strom fließt, der aber des Menschen Lebensenergie und die Vernunft beeinträchtigt.

... Earlier you mentioned all sorts of manner by which you could obtain lead.

I noticed that you did not mention earthly ore mining with a single word.

Is this kind of ore mining not common among you?

Semjase

51. Ore mining or other mineral mining on a planet or on a star is only carried out by us in an extreme emergency, because this process is tantamount to the destruction of the star or the planet.

52. A planet or star must never be exploited in the way it is exploited on the Earth.

53. What the Earth human does with it is tantamount to the destruction of a planet.

54. The first evil effects of this destruction have already been felt on Earth for decades, while the present time is already initiating the contractions of destruction itself.

55. This is to be understood in such a manner that the terrestrial human being exploits his planet and robs him of his fundamental life force by robbing him of oil, natural gas and various ores.

56. This causes the earth to undergo internal shifts, leading to violent volcanic eruptions and earthquakes as the Earth slowly collapses.

57. However, the same process is also produced by the construction of dams and similar structures, which cause very dangerous earth shifts through the accumulated water masses.

58. The human beings on the Earth commits the worst madness with their underground and above-ground atomic bomb experiments as well as with those horrible underground explosive experiments, which are declared to be atomic bomb tests, but which in reality are much more dangerous.

... But now another question from the same source:

Do you drink and smoke?

Semjase

118. A typical earthling question.

119. No, we're not familiar with smoking.

120. Drinking according to earthly terms is also unknown to us, although we also have drinks that are similar to alcoholic beverages.

Billy:

*...But let me ask you a question that was addressed to me about the beverage beer, which is drunk in large quantities especially by the human beings in the industrialised countries of our world. Do you also know this brew? Many human beings on the Earth are beer drinkers, namely men as well as women, but especially also young persons, who get drunk with beer as well as other alcoholic beverages up to the point of loss of consciousness and organise drinking orgies.*

Ptaah:

21. I am oriented about that.

22. But in our place no beer is brewed and therefore also no beer is drunk.

23. Concerning this beverage it also has to be said that it is very detrimental to health if more than one decilitre of it is drunk per day, because it contains toxic substances which damage both the liver, the heart and the remaining organs as well as the cell tissue.

24. In addition to this, the toxins also have a destructive effect on the brain, thereby also damaging the consciousness.

25. In addition, the eyesight is also impaired by beer and other alcohol, because the toxins also damage the retina.

26. Beer also makes the human being lax and can cause fat formation, alcohol-related fatty liver disease and obesity.

27. In the context of the damage to the consciousness, it also impairs the rapid functioning of the intellect, the intelligence and consequently also the thoughts and feelings, however also the physical reaction and movement ability.

28. Like any alcoholic beverage, which also includes beverages reduced in alcohol i.e. propagated as non-alcoholic due to the reduction, beer too is a major factor when it comes to cirrhosis of the liver (comment by Billy: shrinkage of the liver).
